NEWS RELEASE

Ground Breaking Ceremony

PAG to Break Ground for the Facility Expansion of the Guam Commercial Port Improvement Program

Piti, Guam, April 10, 2014: The Port Authority of Guam (PAG) will hold a Ground Breaking Ceremony for the Facility Expansion, the largest construction project of the Guam Commercial Port Improvement (GCPI) Program. The ceremony will take place on Monday, April 14, 2014, at 10:30 a.m., near the Port's Gatehouse on Route 11, Cabras Island.

The launch of the Facility Expansion project, developed by PAG and the U.S. Maritime Administration (MARAD), initiates the final phase of the \$50 million GCPI Program and is scheduled for completion by the third quarter of 2015. The expansion includes a new 4.6 acre container yard, 3.7-acre gate complex, new domestic water and fire distribution system with a 270,000 gallon pre-stressed concrete storage tank, a new electrical load center and associated electrical distribution, high mast lighting, stormwater sewer system and outfall, oil water separators and wash rack facility.

The first GCPI project was the CFS Building Modifications Project finished last January. CFS Building upgrades include a secure cargo storage area, new large rollup doors, and new working spaces. The Selected Demolition and Break Bulk Yard Modifications project expanded the Break Bulk Yard to 10 acres. Both projects are on-time and on-budget.

The GCPI Program is expanding the port's capacity to meet the needs of our island for generations to come. This project has served as a model of cooperation between federal, territorial and local agencies.
