## NEWS RELEASE

### S&P Global Ratings Affirms Port's Long-Term 'A' Rating, Maintains Stable Outlook

**Piti, Guam, October 30, 2024** – S&P Global Ratings has reaffirmed the Port Authority of Guam's long-term 'A' rating on its series 2018 Port Revenue Bonds and maintained its outlook at stable, as per the latest assessment.

"The stable outlook reflects our expectation that port activity will continue to demonstrate resilience in the aftermath of Typhoon Mawar, and remain near current levels," the S&P Global Ratings report states. "The outlook also reflects our expectation that key financial metrics will remain sufficient for the rating and the port's debt capacity will remain strong."

The stable outlook reflects S&P's expectation that the Port will continue to demonstrate resilience in port activity and maintain sound financial metrics, especially following the impact of Typhoon Mawar in 2023. The Port's debt capacity and coverage ratios have also remained strong, which is essential for continued operations and funding future infrastructure projects.

"The rating reflects our opinion of an island port that has relatively stable container volumes given its role as sole provider of maritime facilities and services in Guam and stabilizing military presence due to its strategic importance to the U.S. military, despite relatively high shipping carrier concentration and being located in a region prone to severe weather events," the S&P Global Ratings report states. "The rating also reflects our expectation that the authority's DSC (as per our calculations), debt burden, and liquidity will remain at levels we consider strong, low, and adequate, respectively."

Port General Manager Rory J. Respicio commented, "Our high rating reflects prudent management and the dedication of our Port Strong employees, whose hard work and commitment I am deeply proud to be a part of as a member of the Port Strong family. This achievement aligns with the vision set by Governor Lou Leon Guerrero, Lt. Governor Josh Tenorio, and our Board of Directors, underscoring the importance of the Department of Defense addressing its *Guam DoD Master Plan (Part 1B: Government of Guam Gap Analysis and Execution Plan, 10/2024)* to realize its commitment to building Guam's resilience and strategic capacity in the Indo-Pacific."

According to the S&P report, key credit strengths include:

- Relatively stable container volumes given its virtual monopolistic position as the sole provider of maritime facilities and services in Guam and its strategic importance to the U.S. military;
- Strong coverage (S&P Global Ratings-calculated) that S&P expects will be maintained above 1.25x;
- Robust liquidity, with days cash on hand exceeding 200 days the past two fiscal years, that S&P expects to remain and a low debt burden and anticipated low additional debt needs.

Respicio remarked, "Our high rating is proof positive of the strong management and dedicated leadership at the Port, and it's a direct reflection of our Port Strong team's commitment to Guam's future. For anyone trying to distract from our mission, here's the message: we're here, we're focused, and this administration continues to deliver results. This positive rating from S&P Global reinforces the strides we're making toward operational excellence and fiscal health, positioning the Port as a reliable logistics hub for Guam's commercial and military stakeholders alike."

## Summary:

# Guam Port Authority; Ports/Port Authorities

### Credit Profile

|                         |          |         |
|-------------------------|----------|---------|
| Guam Port Auth port     |          |         |
| <i>Long Term Rating</i> | A/Stable | Current |
| Guam Port Auth port     |          |         |
| <i>Long Term Rating</i> | A/Stable | Current |
| Guam Port Auth port     |          |         |
| <i>Long Term Rating</i> | A/Stable | Current |

### Credit Highlights

- S&P Global Ratings' long-term rating on the Guam Port Authority's (the authority or the port) series 2018 port revenue bonds is 'A'.
- The outlook is stable.

### Security

A senior, statutory lien on the authority's net revenues, less crane surcharges, facility maintenance fees, and public marina revenues, secures the series 2018 bonds. However, under the indenture, for purposes of calculating coverage per the rate covenant and additional bonds test (ABT), the authority is permitted to include crane surcharges used to pay debt service or operating expenses. Bond provisions also include a 1.25x rate covenant and ABT. The indenture coverage calculation also permits noncash accounting adjustments, including those related to pension and other postemployment benefits (OPEB), and is 2.3x for fiscal 2023. S&P Global Ratings' debt service coverage (DSC) calculations indicate historically strong coverage levels, including 2.38x in fiscal 2023. Bond covenants also require a debt service reserve, fully funded with bond proceeds at the lowest of 10% of par, 125% of average annual, or maximum annual debt service.

As of Sept. 30, 2024, the port has approximately \$57.2 million of debt outstanding, consisting solely of port revenue bonds. The authority has no direct-purchase obligations, variable-rate debt, or swaps outstanding.

### Credit overview

The rating reflects our opinion of an island port that has relatively stable container volumes given its role as sole provider of maritime facilities and services in Guam and stabilizing military presence due to its strategic importance to the U.S. military, despite relatively high shipping carrier concentration and being located in a region prone to severe weather events. The rating also reflects our expectation that the authority's DSC (as per our calculations), debt burden, and liquidity will remain at levels we consider strong, low, and adequate, respectively.

The key credit strengths, in our view, are the port's:

- Relatively stable container volumes given its virtual monopolistic position as the sole provider of maritime facilities

and services in Guam and its strategic importance to the U.S. military;

- Strong coverage (S&P Global Ratings-calculated) that we expect will be maintained above 1.25x;
- Robust liquidity, with days cash on hand exceeding 200 days the past two fiscal years, that we expect to remain so; and
- Low debt burden and anticipated low additional debt needs.

Offsetting credit weaknesses, in our view, are the port's:

- Exposure to environmental risks, especially related to typhoons, with considerable damage and disruption in May 2023 caused by Typhoon Mawar, the strongest tropical cyclone to hit the island in more than 20 years;
- Shallow economic base, with exposure to modest fluctuations in demand due to cyclicality;
- Concentrated customer base with about 39% of operating revenue and 51% of cargo volume attributed to Matson Navigation Inc., and significant volume related to U.S. military activity on the island; and
- Very large liabilities combining pension and OPEB, along with a low pension funded ratio.

### **Environmental, social, and governance**

We reviewed the port's environmental, social, and governance risks relative to its market position, management and governance, and financial performance. We believe the port's physical environmental risks as a small island territory in the Pacific Ocean are elevated, and moderately credit negative, given the island's exposure to typhoons, rising sea levels, and tsunamis. We consider social and governance credit factors as neutral in our credit analysis.

## **Outlook**

The stable outlook reflects our expectation that port activity will continue to demonstrate resilience in the aftermath of Typhoon Mawar, and remain near current levels. The outlook also reflects our expectation that key financial metrics will remain sufficient for the rating and the port's debt capacity will remain strong.

### **Downside scenario**

We could lower the rating if the port encounters a sustained decline in activity levels related to exposure to international trade and global economic conditions that weakens financial performance or market position. We could also lower the rating if additional borrowing or decreases in operations result in weaker DSC.

### **Upside scenario**

We do not expect to raise the rating over the outlook horizon given our view that DSC metrics are unlikely to materially improve to stronger levels and the port's exposure to periods of volatility and physical risks.
